

SANJAY S

B.Tech Information Technology Undergraduate

Chennai, Tamil Nadu | sanjaysha9468@gmail.com | github.com/Sanjay9468 | linkedin.com/in/sanjay-s16 | 8056235795

PROFILE

B.Tech Information Technology undergraduate with practical experience developing software applications across full-stack development, backend systems, databases, and DevOps through academic and personal projects. Demonstrates a hands-on approach to problem solving, application development, and deployment, with an interest in building reliable and practical software solutions. Seeking software development opportunities to apply existing skills while continuing to grow as an engineer.

PROJECTS

Digital Lab Record & Internal Evaluation System

2026

React · TypeScript · Node.js · Express · Supabase/PostgreSQL · REST APIs · AI

Built a full-stack academic platform for managing lab submissions, faculty evaluation, internal marks, experiment records, dashboards, and role-based workflows.

- Implemented Student, Faculty, and Administrator workflows with authentication, authorization, and database backed access control.
- Integrated AI-assisted experiment evaluation with faculty override support for controlled and flexible assessment.
- PostgreSQL data models and REST APIs for experiments, submissions, evaluations, and marks management.
- Integrated isolated multi-language code execution using Docker-based runtime environments.

OpsPilot — Docker Infrastructure & Container Management Platform

2026

React · FastAPI · Python · Docker SDK · Docker Compose · PyYAML · psutil

Built a centralized DevOps platform for Docker container lifecycle management, multi-container orchestration, monitoring, cleanup, health diagnostics, and audit logging.

- Developed FastAPI REST APIs integrated with Docker SDK and Compose for deployment, resource estimation, replica scaling, health checks, and automated rollback.
- Implemented a 7-stage Compose deployment workflow with YAML validation, grouped logs, resource estimation, health verification, and rollback on failure.
- Built real-time CPU, memory, and network telemetry with platform health diagnostics and infrastructure health scoring.

REAL-TIME FACE DETECTION & RECOGNITION SYSTEM

2026

Python · OpenCV · MySQL · Tkinter

- Developed a real-time desktop application for face detection and recognition using live webcam input.
- Implemented face-image capture and recognition workflows using OpenCV to identify registered students.
- Integrated MySQL to store student information and retrieve corresponding records after recognition.
- Built a Tkinter-based GUI for student registration, face capture, and real-time recognition.

EDUCATION

B.TECH – INFORMATION TECHNOLOGY

2023-PRESENT

St. Peters College of Engineering and Technology, Chennai

HIGHER SECONDARY – CLASS XII

2021-2023

Sri Sayee Vivekannanda Vidyalaya Matric Higher Secondary School, Chennai

TECHNICAL SKILLS

Languages: Java · Python · JavaScript · SQL

Frontend: React, HTML, CSS, Vite, Tailwind CSS

Backend: Node.js · Express.js · Flask · FastAPI · REST APIs

Database: PostgreSQL, MySQL

DevOps: Docker · Docker Compose · Docker SDK

Tools: Git, GitHub, Docker, Vercel, Render

Core CS: DSA · OOP · DBMS · Operating Systems

HIGHLIGHTS

- Built and deployed full-stack and DevOps projects through hands-on academic and personal development.
- Gained practical exposure to software development, backend systems, databases, containerization, and application deployment.
- Developed projects involving AI-assisted evaluation, Docker-based infrastructure, computer vision, and real-time application workflows.
- Actively strengthening DSA, software engineering, and problem-solving skills through project-based learning.

INTERESTS

- Competitive Programming & DSA · Full-Stack Development · Building Software Projects · Exploring Emerging Technologies · Technical Learning
